KERRVILLE AND CENTER POINT NURSERIES

"WE GROW THE BEST A LITTLE BETTER"

Established in Kerr County in 1897
Fifty Acres in Orchard and Nursery

Members Southwestern Association of Nurserymen
and American Association of Nurserymen

Kerrville and Center Point, Texas

We claim to have the most complete and best stock of evergreens growing in Texas. All of our plants are vigorous and healthy and will be carefully dug with a ball of the natural soil on the roots with a few exceptions, as noted. We grow the very best varieties and by the most efficient methods regardless of cost of production.

No equal amount of money invested will add as much to the value of property as a landscape planting of evergreen shrubbery and trees and with plants adapted to the purpose will increase in beauty and value with age.

We guarantee our stock to be healthy and vigorous, well packed and in good condition to grow. Should it prove otherwise we will replace same upon proper proof, but it is mutually agreed that we assume no responsibility for more than the original purchase price received by us. We do not guarantee trees or plants to live and grow. We are not willing to be responsible for improper planting, handling and cultivation; for droughts, freezes, bad soil, insects or anything else that might prevent growth.

Terms: We usually deliver to towns in counties adjoining Kerr County and to San Antonio by truck. Cash on or before delivery, payable at Kerrville or Center Point, Texas.

We are members of the Southwestern Association of Nurserymen and the American Association of Nurserymen, and no one can obtain or retain membership in the American Association who is not fair and honorable in his dealings.

If interested in fruit trees, grape vines or berry plants, please write for "Special Fruit Tree List."

MOSTY BROTHERS

Ornamental Evergreens

The most satisfactory evergreen shrubs for grouping, borders and foundation planting are the Photinia, Southern and English Laurel and Pyramidal Arbor Vitae for the higher points and Abelia, Ligustrum Lucidum Wax, Ligustrum Reevsii, Euonymous and Nandina for lower growth. The Ligustrum Quihoi, Feijoa and Blue Green Arbor Vitae are valuable to give color contrasts, being of a silver blue color. The Dwarf Golden Arbor Vitae is the most valuable for the golden green effects. The native evergreen Sumac, Leucophyllum and Rosemary are valuable to stand extreme heat, drought and poor soil.

For less expensive plantings the bush form Ligustrum Japanese is used for taller growth and the Amoor River Ligustrum for lower growth, with a few Euonymous to finish the detail.

The Euonymous is the best for hedges, though the Amoor River Ligustrum is a faster grower and less expensive than Euonymous and is used extensively either as a natural, graceful hedge or border and as a trimmed hedge.

Abelia Grandiflora—Dark glossy green small leaf shrub; blooms all summer.

	Each	Dozen	100
2 year	\$1.00	\$10.00
3 year, 2 ft.	\$1.50	\$15.00
Larger plants	\$2.00	\$20.00

Boxwood, Dwarf English—Extremely slow grower.

12-18 inch	\$2.00	\$20.00
------------------	--------	---------	-------
